Bengaluru, India • saptarshikai@gmail.com • [+91-9958080391](tel:+91-9958080391) • Portfolio: saptarshi.design

Summary

Solo designer across three products - SIERA (LeadSquared's no-code reporting & analytics platform, ₹1Cr+ ARR, 10K+ users globally), a platform-wide forms system, and Pulse, the platform's flagship AI solution. Spent 4 years building SIERA - taking it from 0 to open beta to 1, going deep on a complex analytics domain, owning it end-to-end. Currently owning Pulse AI while keeping two other products running independently.

Work Experience

LeadSquared - Bengaluru, Karnataka
Senior UX Designer | 2021 – Present

• **Built SIERA 0→1 as the first designer hire - LeadSquared's no-code reporting & analytics platform, now at 10K+ users & ₹1Cr+ ARR**

- Collaborated across PMs, engineers, KAMs - combining agile sprint cycles with continuous customer intelligence to align on the right problems - shipping SIERA to open beta in 12 weeks.
- Designed the report builder and modular dashboard builder — including complex features like joins and sub-queries — now used by 300+ admins across 200+ accounts, enabling independent report and dashboard creation.
- Established a continuous research loop (5 interviews per week with users and internal teams) to surface insights and prioritize improvements.
- Created launch assets (slides, decks, infographics, and GIFs) for internal teams while owning design QA across all products — ensuring every shipped feature matched design intent before it reached users.

• **Extended UX ownership of platform-wide forms system, Pulse AI (LeadSquared's flagship AI solution), and the new LSQ1 design system**

- Inherited Forms mid-flight - improving existing workflows, designing new features, and transitioning the full product into the new LSQ1 design system.
- Took over Pulse AI's end-to-end UX — starting with identifying and filling missing UI components in the chatbot interface to establish design consistency across the product.
- Designed the complete dashboard widget component library for the LSQ1 design system - covering all chart and visualization types.

Skills & Tools

Skills: Interaction design; Information architecture; User & competitor research; Design testing; Design systems; Data-heavy workflow design; Conversational UI design; Data visualisation

Tools: Figma; FigJam; Pendo; AI-assisted prototyping (Figma Make, Lovable, Claude); Confluence; Notion

Education

KIIT University — B.Tech, Electronics & Instrumentation | 2017–2021

Awards & Achievements

Spotlight Award (November 2021)
